Office Action Summary	Application No. 10/699,045	Applicant(s) SMITH ET AL.	
	Examiner Christopher D. Prone	Art Unit 3738	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Applicant's election of Group 1 claims 1-17 in the reply filed on 3/24/06 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Please note that the applicant has failed to make an election from the required species election requirement mailed out on 3/17/06, however in order to speed up prosecution the species election requirement has been withdrawn.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3-14, 16, and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by United States Patent 5,785,640 Kresch et al.

Kresch discloses the same invention comprising a stem portion (4) having a recess (16) along its length forming a c-shaped cross-section and first and second extension protrusions comprising stationary portions (19) and (20) coupled to the stem forming an angle ranging from 45 to 135 degrees, first and second movable portions

(30) bendably/pivotably coupled to the stationary portions, and gripping elements (22) and (24).

In regards to claim 8, Kresch discloses the same invention but must be interpreted different that sighted above. When viewing the extension members differently as comprising stationary portions located to the right of elements (50) and (52) and the movable portions as elements (10) and (12), shown best in figures 4 and 7, the extension portions form an angle ranging from 135 to 180 degrees.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2 and 15 rejected under 35 U.S.C. 103(a) as being unpatentable over United States Patent 5,785,640 Kresch et al.

Kresch discloses the invention substantially as claimed being a guide for use in medical procedures as disclosed above. However Kresch fails to disclose the exact distance between the extension portions and the stem. It would have been an obvious matter of design choice to make the distance in the first position range from 55-65 mm and the distance in the second position range from 65-75 mm in order to accommodate larger or obese patients. Such a change involving a mere change in size is recognized as being within the level of ordinary skill in the art.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher D. Prone whose telephone number is (571) 272-6085. The examiner can normally be reached on Monday Through Fri 8:30 to 5:00.
